PORTFOLIO

[ammerallj.design](#)

Senior Product Designer

9+ years shaping product behavior across consumer and platform experiences. I define interaction models and systems that help product decisions hold across surfaces and scale.

EXPERIENCE

Meta

Senior Product Designer

Accessibility • Dec 2023–Jul 2026

- Launched Meta's first centralized [public accessibility destination](#), reframing 30+ features around access needs rather than product silos.
- Designed enterprise tooling for accessibility review and submission; automated validation eliminated a recurring 3–5 hour review per wave, and a separate submission workflow saved over 1,700 hours.
- Established and led the AI knowledge workstream, designing how product teams moved from an accessibility question to contextual, authoritative guidance during design and build; the underlying intent and source-routing architecture reduced deprecated results from 25% to zero across 200+ pages.

Product Designer

Facebook Messaging & Private Sharing • Apr–Dec 2023

- Defined a cross-surface interaction model for continuing conversations inside Facebook — operating without a PM — reframing ~144M monthly app-switching clicks as a shared product-behavior problem.
- Specified flows and states; the selected experience increased thread opens 21.9% on iOS and 27.1% on Android.

Facebook Groups • Mar 2022–Apr 2023

Redesigned navigation, states, and key entry points across Community Home, contributing to a 0.26% engagement lift while helping Groups reach ~82% Facebook Design System adoption across iOS and Android.

Microsoft

UX Designer

Microsoft Loop • May 2020–Mar 2022

Defined Loop's [patented](#) interaction model across Microsoft 365 and shipped the first collaborative components in Teams.

Visual Designer

Microsoft 365 • Aug 2017–Apr 2020

Modernized Office during Microsoft's desktop-to-web transition, shaping the Ribbon and translating Fluent Design into reusable UI patterns across Word, Excel, PowerPoint, and Power BI.

EDUCATION

Rochester Institute of Technology • 2017

BFA, New Media Design • Magna Cum Laude

SKILLS

Interaction design • Cross-functional leadership • Product systems • Information architecture • Prototyping • Human–AI interaction • Design systems • Platform design • Visual design
