Senior Product Designer

9+ years shaping product behavior across consumer and platform experiences. I define interaction models and systems that help product decisions hold across surfaces and scale.

EXPERIENCE

Meta

Senior Product Designer

Accessibility • Dec 2023–Jul 2026

- Launched Meta's first centralized [public accessibility destination](#), reframing 30+ features around access needs rather than product silos and connecting discovery directly to Help Center support.
- Designed enterprise tooling for accessibility review and submission; automated validation eliminated a recurring 3–5 hour review per wave, and a separate submission workflow saved over 1,700 hours.
- Established and led the AI knowledge workstream, designing how product teams moved from an accessibility question to contextual, authoritative guidance during design and build; eliminated deprecated content from retrieval results.
- Scaled design practice across 600+ designers through training and shared decision frameworks for applying ambiguous accessibility standards in product work.

Product Designer

Facebook Messaging & Private Sharing • Apr–Dec 2023

Defined a cross-surface messaging model for continuing conversations inside Facebook, addressing more than 100M app-switching clicks to Messenger; the shipped experience increased thread opens 22% on iOS and 27% on Android.

Facebook Groups • Mar 2022–Apr 2023

Redesigned navigation, states, and key entry points across Community Home, contributing to a measurable engagement lift, while helping Groups exceed its design system adoption target across iOS and Android.

Microsoft

UX Designer

Microsoft Loop • May 2020–Mar 2022

Defined Loop's foundational interaction model across Microsoft 365, work later [patented](#), and helped ship the first collaborative components in Teams.

Visual Designer

Microsoft 365 • Aug 2017–Apr 2020

Modernized Office during Microsoft's desktop-to-web transition, shaping the Ribbon and translating Fluent Design into reusable UI patterns across Word, Excel, PowerPoint, and Power BI.

EDUCATION

Rochester Institute of Technology • 2017

BFA, New Media Design · Magna Cum Laude

SKILLS

Interaction design · Product systems · Information architecture · AI-assisted prototyping (Figma Make, Claude Code) · Design systems · Cross-functional leadership
